

How to license Votiro Disarmer for API (SDS-WS) product

Introduction:

This article will assist with the creation of the *MachineStats.xml* file.

This file contains information on the sanitization machine.

Once provided to Votiro's support team, we will be able to generate a correspondence license key for Disarmer for API (SDS-WS) product activation.

How to:

1. Copy the attached MachineStats.zip file to the Disarmer For API server
 2. Extract the file content
 3. Run CMD with Administrator privileges
 4. Navigate to the MachineStats folder
 5. Type: *MachineKeyTool.exe -o c:[FullFilePath]\MachineStats.xml*
 6. A new file will be created in the chosen destination path, it includes the OS version, memory size and number of cores
 7. Send the file to Votiro support then a license file (*VotiroLicense.xml*) will be sent back by our Support team
 8. Place the license file (*VotiroLicense.xml*) in the SDS-WS installation root folder, by default: *C:\Program Files\Votiro\SDS Web Service*
 9. Verify that your machine is successfully activated, navigate to the SNMC log file, by default it is located: *C:\Program Files\Votiro\SDS Web Service\Logs\SNMC*
- The following output should be written in the log in case the system is activated:

Info / License was validated successfully, license details:

Note:

It might take up to 30 minutes for the information to be presented in the SNMC log
